

Simplify and save

For many employers that offer a 401(k), payroll submission can be a tedious and time consuming process. The RMS EasyPlan offers integrations with dozens of payroll providers, empowering you to automate the submission process and further streamline your retirement savings benefit.

How does payroll integration work?

Integration replaces manual processing with automation that seamlessly exchanges payroll, census, and contribution data by establishing a direct connection between your payroll provider and Alerus, the RMS EasyPlan recordkeeper.

BEFORE & AFTER INTEGRATION:

Manual Processing
